

AGENDA

SPECIAL COMMITTEE ON SOLID WASTE ACTIVITIES

July 16, 2012

**Aldermen Craig, Arnold,
Corriveau, Greazzo, Osborne**

4:00 p.m.

**Aldermanic Chambers
City Hall (3rd Floor)**

1. Chairman Craig calls the meeting to order.
2. The Clerk calls the roll.
3. Updated on citywide single stream recycling.
4. Updated on downtown single stream recycling.
5. Discussion regarding bulky item pick-up.
6. Manchester Solid Waste report, submitted by the Public Works Director.
Ladies and Gentlemen, what is your pleasure?
7. If there is no further business, a motion is in order to adjourn.

Kevin A. Sheppard, P.E.
Public Works Director

Timothy J. Clougherty
Deputy Public Works Director

Commission
Raymond Hebert

Manchester, New Hampshire 03101

Re: City-wide Single Stream Recycling

Dear Chairman Craig:

The city-wide single stream program began the week of April 30th. Prior to single stream collection, we had approximately 12,000 households participating in dual stream curbside collection. Currently, there are over 16,000 blue recycling carts that have been delivered to property owners in Manchester.

Although I do not believe that two months of data is adequate to determine a trend, it is good news to see that our curbside recycling tonnage has almost doubled over the past two months. It was our hope and our plan to see this increase in tonnage and I believe that we will continue to see an increase as residents become more familiar with our program.

For your information, during implementation of the program, a few issues came to our attention:

1. Multi-family and condominium associations
 - Blue carts were not delivered to each residential unit but rather an adequate amount of carts were provided for the total recycling done by each property (as determined by Pinard Waste).
 - Some of these property owners have requested a cart for each residential unit.
2. Businesses
 - We have received requests for blue carts from some businesses that are not currently part of our curbside solid waste collection.

Page 2.

3. Cart Sizes

- Most single family property owners received a 65 gallon cart. If it is determined that their cart is too small for the amount of recycling they generate, the cart will be replaced with a 95 gallon cart. Likewise, if they do not generate enough to fill up a 65 gallon cart, they can request a 35 gallon cart.

4. Collection

- We need to continue to educate residents, especially regarding the fact that Pinard Waste Systems will only collect what is in the blue cart. Recyclables, such as boxes, cannot be left outside of the blue cart.

5. Dead End Streets

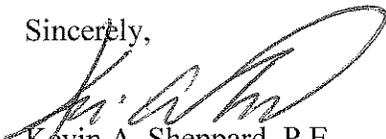

- We have asked some property owners who reside on dead end streets to place their blue carts on one side of the street due to the difficulty for the truck driver in servicing both sides of the street.

6. Plastic Bags

- A few residents have asked us to include plastic bags in our collection program. The Material Recovery Facilities do not accept these as they cause problems with their sorting equipment.

We are very excited about the progress of the single stream recycling program and look forward to its continued success.

Sincerely,

Kevin A. Sheppard, P.E.
Public Works Director

Single Stream [FAQ](#) [What Can I Recycle](#) [Sign Up](#) [Collection Map](#) [Downtown Recycling](#)

What Is Single Stream Recycling?

Single Stream recycling allows residents to put all paper products, glass jars and bottles, aluminum and steel cans, and plastic containers (#1-#7) into one collection container. The materials are then separated and processed at a MRF (Material Recovery Facility) and sold to end-markets.

About

The City of Manchester began a curbside dual stream recycling program back in 1996. Last year, we collected 4,400 tons of recyclables. This equates to a 10% recycling rate. With the move to single stream recycling, we hope to increase the recycling rate to 25% thus keeping approximately 10,000 tons of material out of the waste stream.

Single Stream Collection has begun! Remember that your cart has to be at least 3 feet from any object, such as a trash can, mailbox, telephone pole AND that the handle has to face your house. The pictures above demonstrate how your recycling is emptied.

Also, Pinard Waste is **no longer collecting recycling in the bins or any container other than the blue carts**. If you have requested a cart but haven't received it yet, please hold on to your recycling until your cart is delivered.

How does it work?

Everything goes in one cart - it's that easy! Please make sure that you break down cardboard boxes before putting them into the cart.

What does the cart look like?

All single family residences that wish to participate will receive a blue 65 gallon cart with wheels and a lid. Multi-family units, condo associations and small businesses who wish to participate may get a 95 gallon cart instead. We also have 35 gallon carts available. There is a label on the lid informing you of what can and cannot go into the cart. Each cart also has a RFID (radio-frequency identification) chip embedded in it that will link the cart to the address it is delivered to. This will assist the City in keeping track of the carts.

Why single stream?

- Saves time and money in collection
- More convenient for residents
- Less wind scatter and litter
- Protection of paper from rain
- Can use standardized collection trucks
- Allows for automated collection
- Improved community aesthetics
- Net increase in total materials recovered

Re: Future Discussion Items

Dear Chairman Craig;

In the past, the Committee has discussed several items which I believe warrant further discussion.

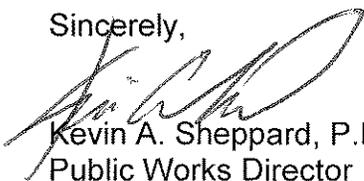

➤ Bulky Waste

Currently, we allow free disposal of bulky items at the Citizen Drop-Off Center, located on Dunbarton Road. We also provide free curbside collection of this material with a limit of four collections per year. We would recommend to begin charging for the curbside service while continuing to allow free disposal at our Drop-Off Facility.

➤ Balance of items of the Manchester Solid Waste Report, dated September 2004 (see attachment).

I will be available at your next meeting to discuss these items further.

Sincerely,

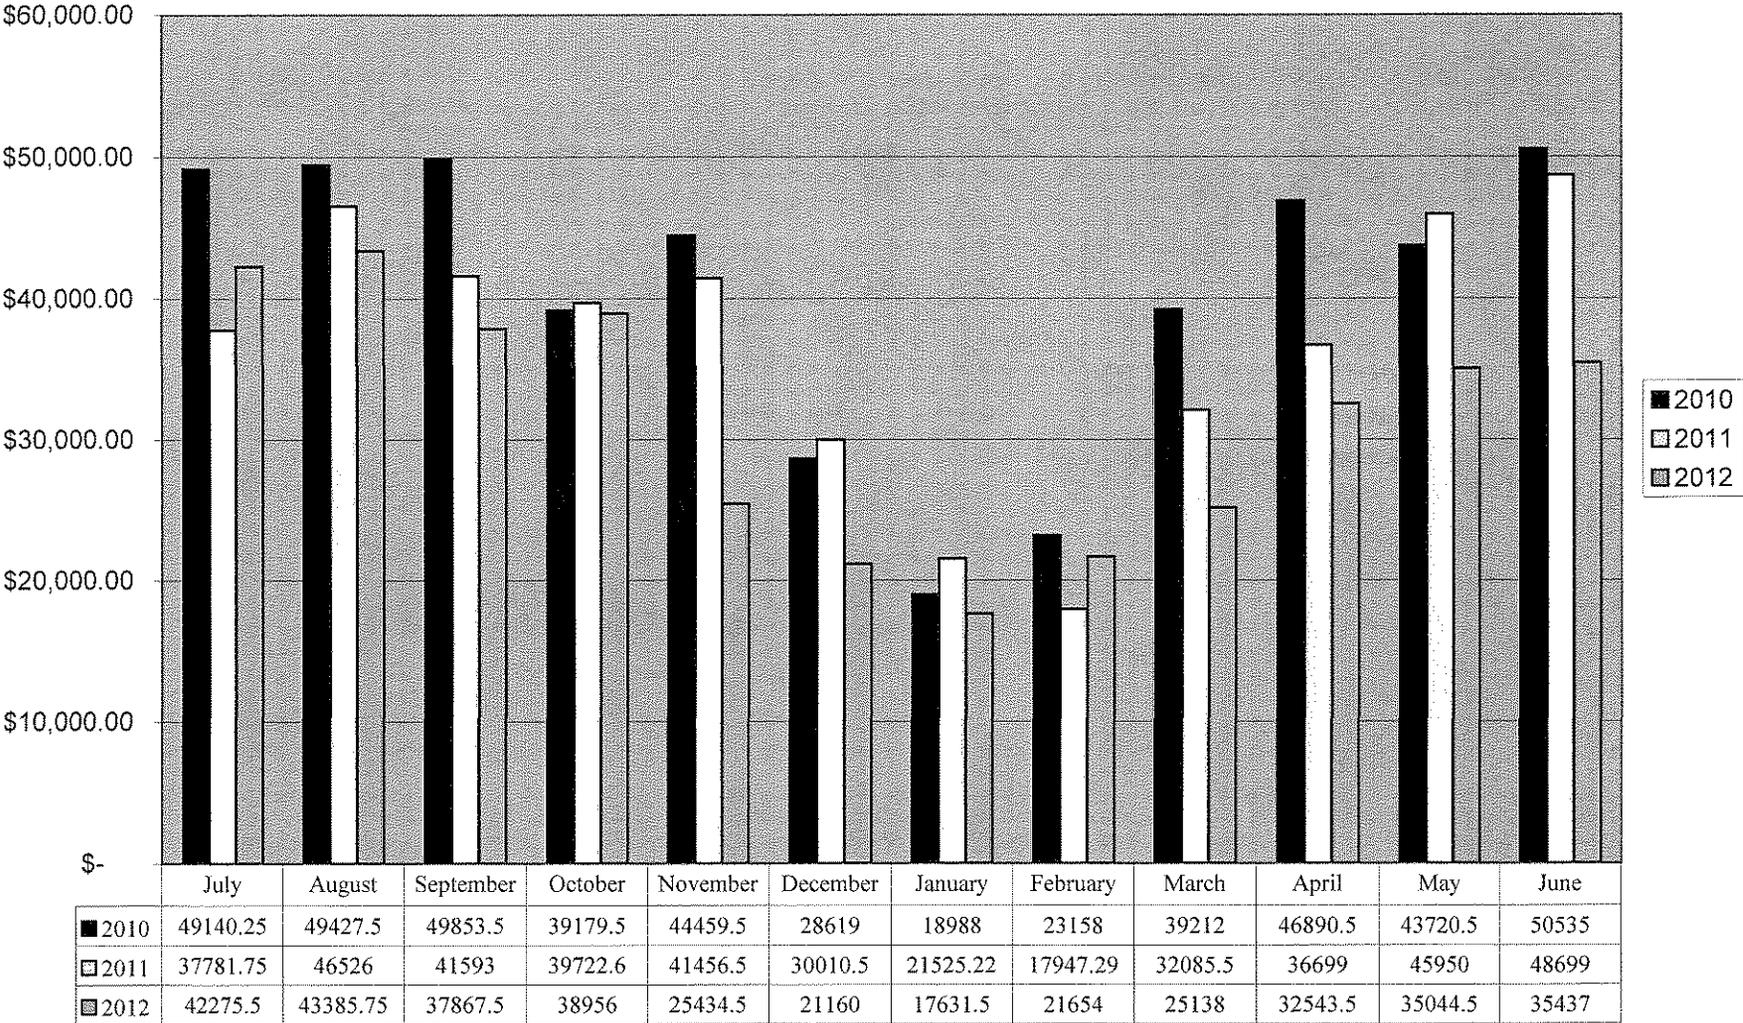

Kevin A. Sheppard, P.E.
Public Works Director

MANCHESTER SOLID WASTE REPORT SOLID WASTE FOCUS GROUP

The City of Manchester (City), through its Department of Public Works (Department), provides solid waste services to its residents and some commercial entities. The City underwent key changes in its Solid Waste Program coincident with the closure of its Landfill in 1996. At that time, the City contracted with Waste Management, Inc. (WM) for municipal solid waste disposal, and recycling and yard waste collection services. Also, the City-operated Drop-Off Facility on Dunbarton Road was constructed and opened.

In light of the fact that the WM contracts are due for renewal, the Department and its Director are reviewing the City Solid Waste Program, evaluating its past choices, and making recommendations for plotting its 21st century course. After almost a decade on its present course, the City has learned a number of lessons, both positive and negative that it wishes to incorporate into its future program.

The City currently provides a high level of comprehensive solid waste services when compared to most municipalities, and taxpayers are getting a great value for the dollars spent on its Solid Waste Program. These services include:

- ◆ Weekly curbside collection of municipal solid waste provided by the City staff. The Department has seen 5% annual increases in solid waste tonnages in the past, yet continues to provide an excellent service with the same equipment and staff resources. The City has a ten-year plus four five-year contract options (total of 30 years) with WM for solid waste transport and disposal services.
- ◆ Bi-weekly curbside collection and recycling of commingled containers, glass, aluminum, tin, plastics 1 and 2, commingled paper, and cardboard by WM. This contract expires December 2005.
- ◆ Bi-weekly and weekly seasonal curbside collection of yard waste by WM. The WM contract expires January 2006, and the last year's options currently need to be acted on (see second Immediate Implementation recommendation).
- ◆ Free bulky material collection service provided to residents by the City staff (mattresses, couches, etc.), with disposal provided by WM. There have been no limitations on these free services to date and the program is being heavily used by owners of multi-family dwellings and property managers.
- ◆ Seven day collection of refuse (all materials) in the Downtown Toter Collection Zone (see City Ordinance as Attachment A and 7 Day Downtown Toter Collection Zone Map as Attachment B).
- ◆ Metals and appliance pick up by City staff (see Fee Schedule Exhibit as Attachment C).
- ◆ Municipally-operated Drop-Off Facility services:

- ✓ Recycling of commingled containers, commingled papers, and cardboard at no charge.
- ✓ Disposal of bulky material, construction and demolition debris, and yard waste (\$0.075 per pound, with WM disposal).
- ✓ Recycling of metals, appliances, propane tanks, and computers and televisions for a fee.
- ✓ Recycling of automotive tires and batteries, and used oil at no charge.
- ✓ Goodwill drop-off for clothing.
- ✓ Free recycling bins.
- ✓ Sale of toters.
- ✓ Two annual Household Hazardous Waste Collection Events.

Operating these services for nearly a decade since the Landfill closed has provided a number of lessons learned and made it very clear that the City must clearly define its customer base to manage future costs. For this and a number of reasons, the Public Works Director convened a focused cross section of stakeholders in the City's Solid Waste Management Program, including the Director, the Deputy Director, the Solid Waste and Recycling Superintendents, two Aldermen from the Aldermanic Solid Waste and Recycling Committee, a representative from the Mayor's Office, and the City's solid waste consultant, to review its current program and make recommendations for the future of the City's Solid Waste Program.

The Solid Waste Focus Group recommends the following actions:

Immediate Implementation (by the end of FY 2005)

- Continue the residential municipal solid waste curbside collection program provided by City staff due to the high level of cost effective services provided the residents of Manchester. Long-term, environmentally safe disposal of solid waste at a reasonable price is critical to a municipality. Therefore, it is recommended to stay the course with the existing WM Transfer and Disposal Contract and to renew it in 2006 for the first of four available five-year options.
- The City should exercise its last one-year option with WM for both recycling and yard waste services. This will allow City staff an appropriate amount of time to develop an all encompassing Request for Proposals (RFP) for these services.
- A RFP should be developed for recycling and yard waste services. This procurement should request proposals to maintain the present level of services, and as an alternative, weekly collection of recyclables; and, as a further permitted alternative suggestions of ways of increasing the recycling participation rate and/or reducing solid waste costs.
- Augment Saturday Drop-off Hours by remaining open from 7:00 a.m. to 4:00 p.m., instead of the current 7:00 a. m. to 11:00 a.m., on the first and third Saturdays of the month.
- Permit toter use by small commercial establishments and small non-profit organizations. These entities will be allowed to purchase and use up to two toters provided they also recycle.

Short-Term Implementation (by the end of FY 2007)

- Define a list of City customers and non-customers, similar to Attachment D, obtain Board of Mayor and Aldermen approval of this list of customers, and define a preliminary implementation schedule to conform City services to this list of customers. This list should be developed as a database that can be easily referenced and managed.
- Make the use of toters mandatory for the Downtown Toter Collection Zone (see City Ordinance as Attachment A and 7 Day Downtown Toter Collection Zone Map as Attachment B).
- A recycling program should be developed for the Downtown District. This program could initially begin by recycling cardboard and eventually transition into collecting containers of commingled recyclables. These services should be included in the RFP for recycling and yard waste services, but potentially could be initially started by utilizing existing Highway Department resources.
- Bulky waste collection of household items (furniture, etc.) will be restricted to two free pick-ups per property per year. Properties requiring additional pick-ups in any given calendar year will be charged for these services (charges will be developed). The collection of "white goods" for the established fees will continue, but the fee schedule will be periodically reevaluated. Properties will continue to have the option of bringing bulky items to the Drop-Off Facility (annual \$5 permit and \$0.075 per pound).
- Create an enforcement position(s) for solid waste oversight utilizing fees generated from the modified bulky waste collection program and/or solid waste user fees.
- Develop a proposal to provide free residential disposal of yard waste at the Drop-Off Facility. The RFP for recycling and yard waste services should consider this expanded service. Commercial businesses will continue to be charged the established fee of \$0.075 per pound.
- Move to a weekly single-stream-recycling program with collection on the same day as refuse collection. The RFP for recycling and yard waste services should consider this proposal.

Longer Term Implementation

- Develop and implement a user fee for solid waste collection and disposal services. Integrate the use of toters into a "Pay-As-You-Throw" program.
- With the customer base established under the "Short-Term Implementation" recommendations, define an implementation plan to address the customer list identified in Attachment D. Implementation of this proposal may raise the greatest concerns due to a loss of an existing service. Therefore, there may be a need to assist in defining dumpster locations and/or arranging for private sector services for residential properties over six units.

- Continue to review and evaluate integration of customer friendly waste reduction strategies into the City's Solid Waste Program. Industry trends will continue to be in the direction of increased disposal costs and reduction/reuse/recycling innovations. The City must continue to be in front of these trends.

SOLID WASTE FOCUS GROUP

- ◆ Frank Thomas, P.E., Public Works Director
- ◆ Kevin Sheppard, P.E., Deputy Public Works Director
- ◆ Robert Neveu, Solid Waste Superintendent
- ◆ Joanne McLaughlin, P.G., Recycling Coordinator/Superintendent
- ◆ Armand Forest, Alderman Ward 12, Chairman of City Solid Waste and Recycling Committee
- ◆ Mark Roy, Alderman Ward 1, Solid Waste and Recycling Committee
- ◆ Mike Colby, Assistant to the Mayor
- ◆ Ken Rhodes, P.E., City Solid Waste Consultant, CLD Engineering/Discussion Moderator

Manchester, NH Code of Ordinances

§ 91.62 REGULATIONS AUTHORIZED.

The Public Works Director and the Health Officer are hereby authorized to promulgate such rules and regulations as may be necessary and convenient to effectuate the purposes and requirements of this chapter.

(Ord. passed 4-16-02)

§ 91.63 DEFINITIONS.

For the purpose of this chapter, the following definitions shall apply unless the context clearly indicates or requires a different meaning.

AUTHORIZED PRIVATE RECEPTACLE. Litter storage and collection receptacle as required and authorized by this chapter.

DOWNTOWN TOTES COLLECTION ZONE. An area bounded by Dow Street and Myrtle Street at the north, Lake Avenue and West Auburn Street at the south, Chestnut Street at the east and Hampshire Lane at the west.

DUMPSTER. A large sturdy metal container, with a capacity exceeding two cubic yards, for the collection of rubbish or garbage, designed to be emptied or transported to a dump by a specially designed truck.

GARBAGE. All putrescible waste material including, but not limited to, wastes resulting from the handling, preparation, cooking and consumption of food. GARBAGE shall not include market, industrial, yard, hazardous, infectious, and/or radioactive waste.

HEALTH AUTHORITY. The Health Officer of the city or his designated representatives.

LITTER. Garbage and rubbish as defined herein and all other waste material.

MULTI-FAMILY DWELLING. Any building or structure used and occupied for human habitation or intended to be so used which contains more than two suites of one or more rooms each suite having facilities for regular cooking.

PARK. Any park, reservation, playground, beach, recreation center or other public area owned or used by the city and devoted to active or passive recreation.

PRIVATE PREMISES. Any dwelling, house, building, or other structure designed or used, either wholly or in part, for private purposes and regardless of whether or not the premises are inhabited or temporarily or continuously vacant. Such premises shall include any yard, grounds, walk, driveway, porch, steps, vestibule, or mailbox belonging or appurtenant thereto.

PUBLIC PLACE. Any public building, park, square, space, grounds, street, sidewalk, boulevard, alley or other public way.

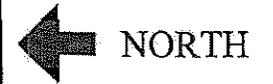

RUBBISH. All nonputrescible waste material including, but not limited to, paper, cigarettes, cardboard,
