LIFE SAFETY INSPECTION

General Instructions and Procedures for a Life Safety Inspection for
Unlicensed Family Day Care Home

\$25. Inspection Fee

New Hampshire Law RSA 170-E:34 requires that a family day care home be inspected by the local fire department and that the fire code for a single family residence shall be applied by local fire departments in their review of compliance with local ordinances for family homes.

On the following pages, you will find a self-evaluation guide and a checklist.

Before calling for an inspection, please take a few minutes to do a self-evaluation of the home to become familiar with the types of things that the Marshal will be looking for.

Once you are confident that you are ready for an inspection, call the Manchester Fire Department, Fire Prevention Bureau and ask to speak to a Marshal. Please refer to the following checklist. This is a general checklist and is intended as a guide only.

A Manchester Fire Marshal can be reached at (603) 669-2256.
