TEMPORARY FOOD PERMIT APPLICANTS

Enclosed are the requirements and an application for a permit to operate a temporary food establishment in the City of Manchester, New Hampshire.

Unless you have a valid Manchester Health Department permit to operate as a mobile food vendor, you must file an application for a temporary permit. A permit to operate a food establishment, such as a restaurant, does not allow you to operate a temporary food establishment without prior approval.

The Manchester Health Department has the responsibility to insure that all foods provided to the public in Manchester are from safe and approved sources. The Health Department cannot issue a permit until this can be ascertained. Establishments which are not in compliance with the NH Sanitary Food Code (or equivalent code if out of state) will not be issued a permit in the City of Manchester. Operation of a food establishment in Manchester be it temporary or otherwise, without a permit is in violation of City Ordinance.

To ensure that the Health Department has a sufficient period of time to process an application, all applications should be submitted at least **2 weeks prior** to the planned event. If this is not done, a Health Department permit may not be issued and the establishment may not be able to operate at the requested event.

YOU MUST NOTIFY THE HEALTH DEPARTMENT IN ADVANCE **IF YOU NEED TO CANCEL/RESCHEDULE YOUR EVENT** VIA THE EVENT CANCELLATION HOTLINE **(628-6003, Press Option #3)**. Failure to do so may prevent you from obtaining a temporary food license in the future.

Please note that all applicants must include:

1. A completed temporary food service application form. (Page 2 both sides)
2. Applicable fees.
3. **IF COMING FROM OUTSIDE MANCHESTER:**
 - a. A copy of your current state or local food permit.
 - b. A copy of your most current (within 6 months) inspection report.
4. **IF YOU ARE NOT CURRENTLY LICENSED BY A STATE OR LOCAL HEALTH DEPARTMENT:**
 - a. A copy of the commissary's current state or local food permit.
 - b. A copy of the commissary's most current (within 6 months) inspection report.

If you have any questions, please contact the Manchester Health Department.

Manchester Health Department
1528 Elm Street, Suite 302
Manchester, NH 03101
Tel: (603) 624-6466 - Fax: (603) 628-6004

How to properly prepare and use sanitizers

Either regular (unscented) bleach or quaternary ammonium (in liquid or tablet form) may be used to sanitize your food service equipment and preparation surfaces.

To make the bleach and water solution at the proper concentration, use the following guideline:

Add 1 tablespoon regular bleach to 1 Gallon of water

(This will give you a 200 ppm chlorine solution)

Use chemical test strips to check the concentration of the solution. A bleach and water solution for sanitizing food preparation surfaces and equipment shall be in the range of 50-200 ppm chlorine at $\geq 75^{\circ}\text{F}$.

For quaternary ammonium, either liquid or tablet form may be used. If using either the liquid or tablet form, follow the manufacturer's directions on the bottle/container in order to obtain the proper concentration.

Use chemical test strips to check the concentration of the solution. Please verify the allowable concentration of quaternary ammonium per manufacturer's guidelines.

Helpful hint: If making a spray bottle of sanitizer, it may be easier to make a large batch of the sanitizer at the proper concentration and then fill the spray bottle, rather than try and make it in the bottle itself.

Chlorine Test Kit

How to use test strips

- Make sure the test strip is appropriate for the type of sanitizer.
- Prepare the sanitizing solution.
- Dip a strip into the solution for at least 10 seconds.
- Compare the color the strip changed to with the guide on the outside of the package to determine the solution strength.

Check the concentration frequently using the test strips. The solution will need to be changed periodically, especially if it becomes dirty with food or other debris.

Temporary Hand Washing Setup

WASH HANDS:

BEFORE:

- Starting to work/prepare food
- Handling Ready-to-eat food

AFTER:

- Using the restroom
- Sneezing
- Coughing
- Touching face or hair
- Touching raw food
- Eating or drinking
- Emptying/handling garbage
- Smoking
- Handling money
- Any chance of contamination

Provide warm water for handwashing (minimum of 100°F). Ensure that a waste water container is provided and that all waste water is disposed if in the sanitary sewer – not down a storm drain or on the ground.
