

ACKNOWLEDGEMENTS

This report meets the requirements for all Manchester area health care charitable trusts to develop a 2009 community needs assessment. The development of this report, *Believe in a Healthy Community*, was through a joint community effort spearheaded and guided by the Data Committee of the Manchester Sustainable Access Project, with quantitative data analysis and report design provided by the City of Manchester Health Department and the New Hampshire Department of Health and Human Services. Funding for this project was provided by Catholic Medical Center, Dartmouth-Hitchcock Manchester, and Elliot Health System. Technical assistance and support to this effort including the development and summary of all qualitative data and report design were provided through a contract with the Community Health Institute of Bow, New Hampshire.
