

GenericSelect:TM The same type of medicine but for less

If you take a brand-name drug, the GenericSelect program lets you try a generic choice on our list — and get the first prescription at no cost. By choosing a generic, you get the same type of medicine you need but often at a lower cost.

What is GenericSelect?

It's a program that lets you try a generic choice on our list at no cost the first time you fill a new prescription. And, since generics cost less than brand-name drugs, you save money, after your first fill, every time you refill the prescription for the generic.

How to get started with GenericSelect

First, speak to your doctor to see if one of the GenericSelect generic drugs is right for you. If it is, your doctor should give you a new prescription for that drug.

Try a generic, on us

If you take a brand-name drug that is on our list, you can switch to a GenericSelect drug and get your first generic prescription at no cost to you. There's no copay for the first fill but you will have to pay the applicable copay for future refills.

Two great ways to save — retail or home delivery

1. You can take your new prescription to a retail pharmacy and get a 30-day supply at no cost to you.
2. Or you can send your new prescription to our preferred Home Delivery Pharmacy and get up to a 90-day supply at no cost to you. You'll refill your prescriptions fewer times, which means fewer copays, saving you even more money. And, your prescriptions will be sent to your home.

Either way, you'll only have to pay your usual generic copay for all future refills. That way, you will keep saving as long as you use the GenericSelect drug.

Is a generic right for me?

Ask your doctor if a GenericSelect drug might be right for you instead of the brand-name drugs on our list. Never switch any medicine until you talk to your doctor. The U.S. Food and Drug Administration (FDA) states that generics must have the same high standards for purity, quality, safety and strength as brand-name drugs. Because generics must meet the same standards as brand-name drugs, you can be sure the generic is just as safe and works just as well.

GenericSelect drug list

| Condition | Common brand-name* | GenericSelect™ option |

*Preferred brand — If your doctor feels you can switch from a preferred brand drug to a GenericSelect option, you'll have the lowest copay.

**Non-preferred brand — When you take a non-preferred brand drug, you pay the highest copay or you may even pay the total cost of the non-preferred brand drug. Ask your doctor if switching to a GenericSelect option is right for you and save on your prescription drug costs.

***Benzoyl peroxide is available as an over-the-counter medication and may not be covered by your benefit.
